OBJECTIVE

B.Tech AI & Data Science student (CGPA: 8.71) seeking a research internship to contribute to large-scale intelligent systems. Experienced in building LLM pipelines, agentic AI workflows, and ML models — passionate about advancing AI research that creates real-world impact.

EDUCATION

B.Tech – Artificial Intelligence & Data Science

2024 – 2028

V.S.B Engineering College, Karur | CGPA: 8.71

INTERNSHIP EXPERIENCE

AI & ML Intern | Labmentix

May 2026 – Jul 2026

- Worked on machine learning model development and data preprocessing pipelines under industry mentorship.
- Gained hands-on experience with supervised learning workflows, feature engineering, and model evaluation techniques.

AI Trend Forecasting Intern | Infosys Springboard (Virtual)

Feb 2026 – Apr 2026

- Built asynchronous FastAPI backend integrating web scraping pipelines (Selenium, BeautifulSoup) with LLM endpoints for real-time financial sentiment extraction.
- Implemented JWT-based authentication with role-level access control across all API resources.

PROJECTS

Autonomous Coding Agent | Agentic AI System

2026

Python · LangGraph · RAG · sentence-transformers · Groq/LLaMA 3.3 70B · MCP

- Designed a ReAct-based autonomous agent for code planning, generation, and debugging with RAG-powered context retrieval using FAISS and sentence-transformers.
- Integrated Model Context Protocol (MCP) for structured tool use, enabling interaction with external APIs and file systems.

FinVoice AI | Multilingual Voice Banking Platform

2026

FastAPI · React · Groq/LLaMA · Whisper ASR · Python

- Built voice-first AI assistant for rural India combining Whisper speech recognition with multilingual NLP — targeting low-literacy users in regional languages.
- Deployed as a hackathon submission demonstrating real-world generative AI impact at scale.

Shopper Spectrum | Customer Segmentation (ML Research)

2026

Python · Scikit-learn · K-Means · DBSCAN · Hierarchical Clustering

- Applied RFM feature engineering on UCI Online Retail dataset; compared K-Means, DBSCAN, and Hierarchical Clustering using Silhouette Score and Davies-Bouldin Index.

AI-Enabled Market Trend Forecaster

2026

FastAPI · LLMs · Selenium · BeautifulSoup · JWT

- Integrated LLMs for real-time sentiment extraction on financial headlines; secured API with JWT authentication and role-based access control.

TECHNICAL SKILLS

Languages Python, SQL, Java, JavaScript, HTML/CSS

AI / ML Scikit-learn, TensorFlow, XGBoost, LLMs, RAG, NLP, Agentic AI, EDA, Feature Engineering

Frameworks FastAPI, LangChain, LangGraph, Streamlit, React, Groq API, Whisper, FAISS

Tools Git, GitHub, Jupyter, Pandas, NumPy, Plotly, Postman

CERTIFICATIONS

- NPTEL – Database Management Systems (DBMS), IIT / Ministry of Education, Government of India
